

TITAN HARDOX® 450 STEEL

THE TITAN BUILD OFFERS TWICE THE LIFESPAN OF OTHER MILD STEEL EQUIPMENT.

The Titan is manufactured of Hardox® 450 steel, amongst the most wear-resistant steels in the world. With its high hardness and tensile strength, Hardox® steel preserves your mixer from any dents, cracks, rust points and wear. As part of the Hardox in my Body program, this guarantees top-end manufacturing and build quality.

-  **200% LONGER SERVICE LIFE**
-  **LIGHTWEIGHT**
-  **15% HIGHER RESALE**

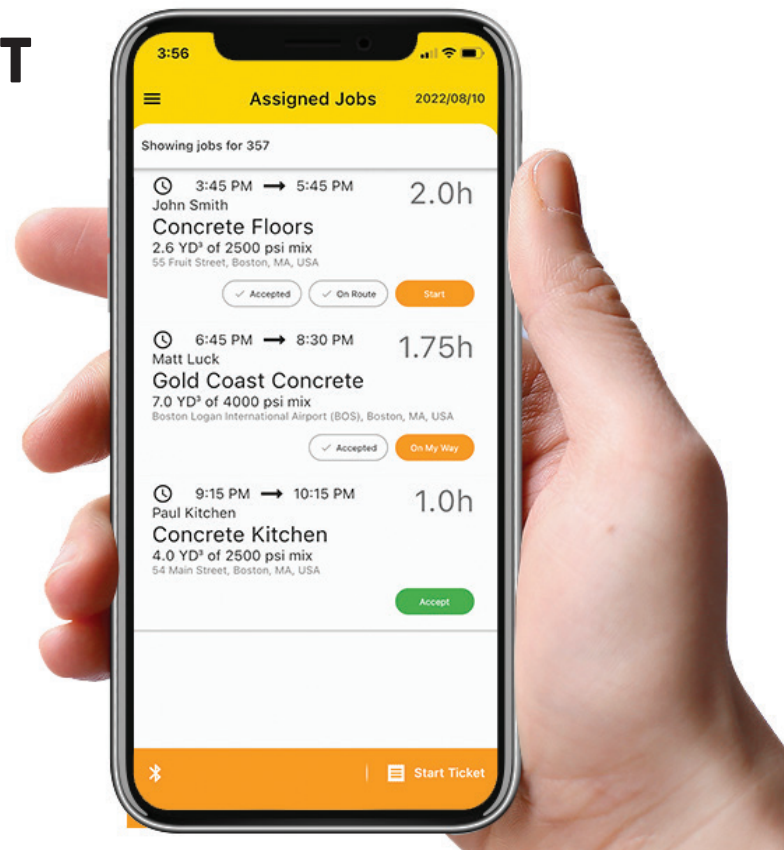

BATCHPRO CONNECT

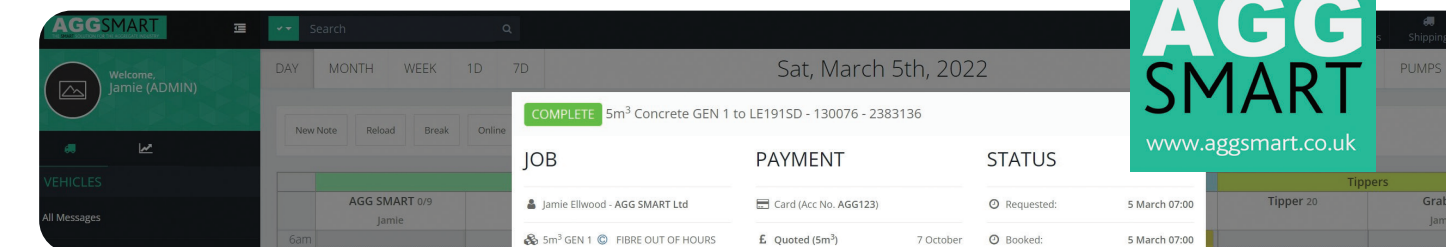

THE WORLD'S MOST ADVANCED MIXER COMMUNICATION SYSTEM

With patent pending technology including an operator's mobile app and Bluetooth connectivity, managing your concrete has never been easier.

- Dispatch and assign jobs with the Dispatch Web Platform
- Receive customer signatures and photos immediately following a pour
- Easily calibrate your mixer with a step-by-step walk through
- Track your truck's location

COMPATIBLE WITH AGGSMART

THE SMART SOLUTION FOR THE CONCRETE INDUSTRY
AGG SMART

BAY-LYNX IS HERE TO MAKE SURE YOUR BUSINESS SUCCEEDS.

Whether you need parts shipped to you overnight, a calibration, training for a new operator or technical support, we have your back!

“EXCELLENT AND REALLY GREAT CUSTOMER SERVICE AND SUPPORT!”
*Emma
John Simpson Concrete*

“BEST MIXER BY FAR AND THE BODY WILL LAST FOREVER!”
*Percy
R.T. Mycock & Sons*

“I’VE BEEN ON VOLUMETRICS FOR 20 YEARS AND THE BAY-LYNX TITAN IS BY FAR THE BEST AND EASIEST TO OPERATE!”
*Gary
Tru7 Group*

“EXCELLENT MACHINE! CAN’T FAULT THEM! THE BACK-UP AND SERVICE IS SUPERB!”
*Paul
Free Mix Concrete*

“IT IS EVERYTHING I IMAGINED IT WOULD BE AND I WOULDN’T CHANGE A THING.”
*Tom

FRESH CONCRETE MIXED ON SITE

A volumetric concrete mixer holds all components of concrete; stone, sand, cement and water. These materials along with any chemical admixtures required are batched on site for maximum strength and workability. Mix design can be changed on location to offer multiple mix recipes on the same load.

VOLUME CONTROL

Batch only as much as you need with a volumetric mixer. No more overloading and waste, no more underloading and needing an emergency load. A volumetric mixer can do multiple jobs in a single trip for improved logistics and efficient deliveries.

QUALITY CONTROL

A volumetric mixer ensures the concrete does not have a shelf life. This means that the same quality mix can be delivered to sites hours away. Utility work where waiting is required? The volumetric mixer can wait with you without you having to worry about concrete going off.

VOLUMETRIC MIXER OVERVIEW

Numbers 6 and 7 displayed in orange to denote they are on the inside or other side of the body.
